

## Product Comparison

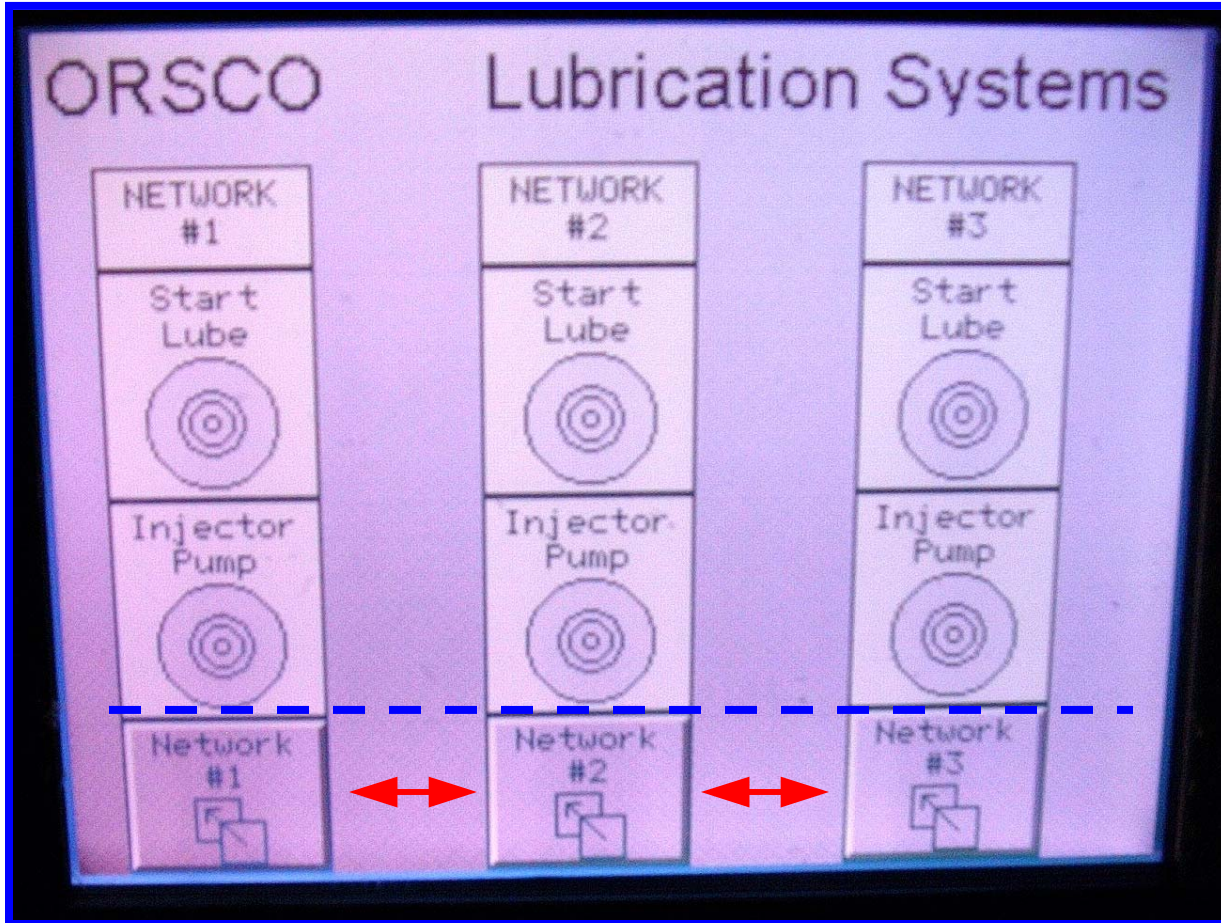

New interface and standard product shown below. Both products use the same size back plate currently, but this may change in the future.

**(3) Network System w/  
Touch Screen  
Interface**

Standard Series 170 System  
(single network shown)

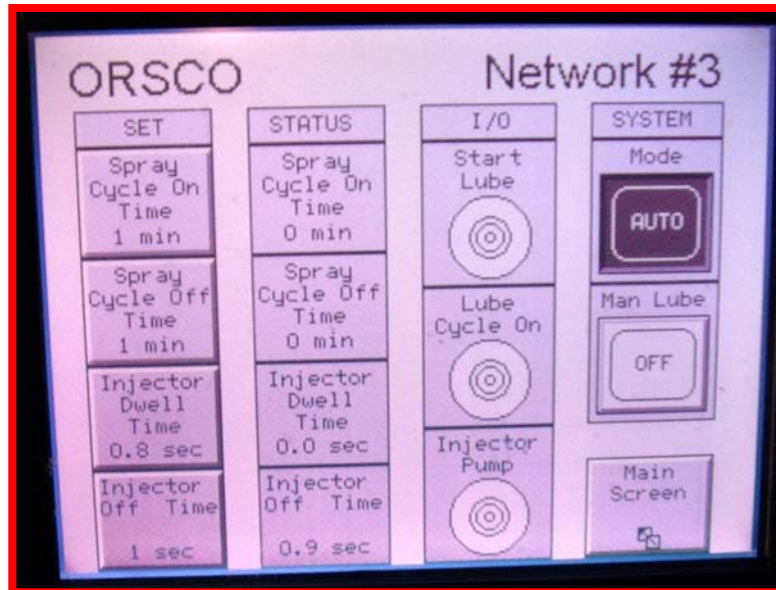

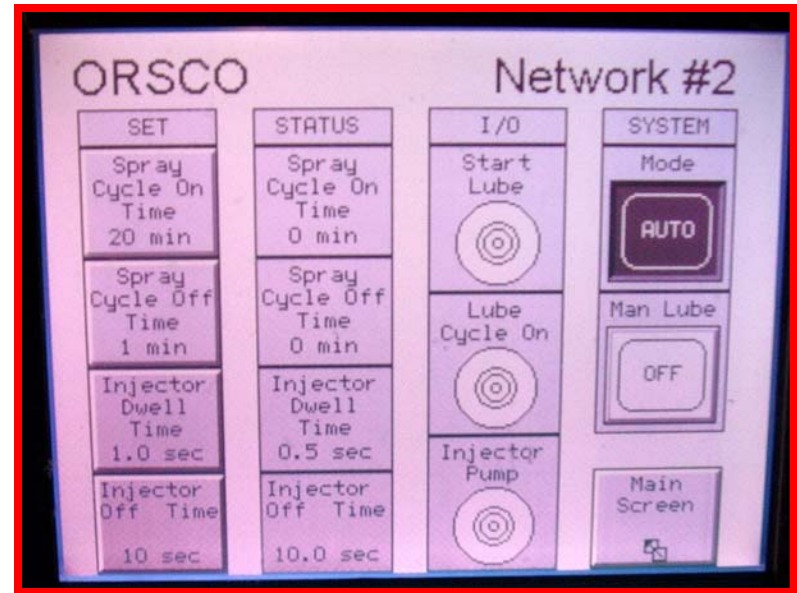

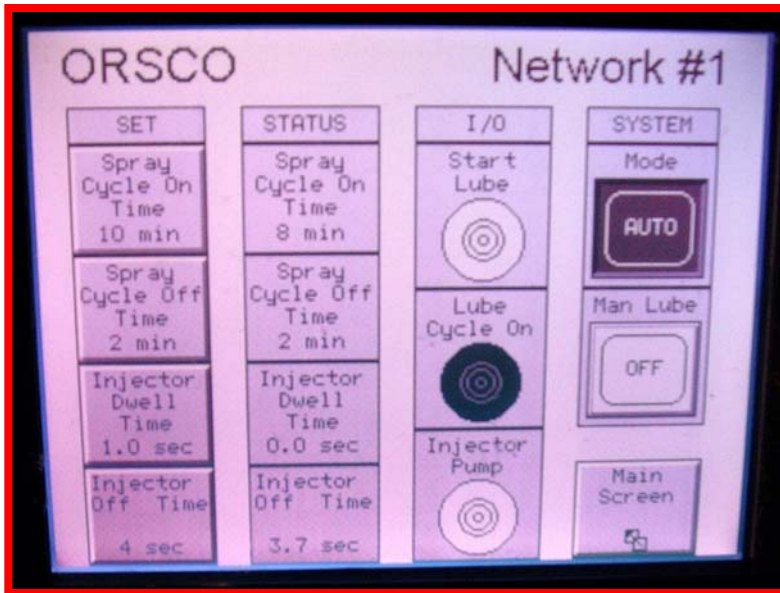

## Main Menu

This is the main menu from which you can see the activities of all (3) networks, and you can choose to **change the operating parameters by touching the bottom square**. The images on the following page illustrate the individual screens dedicated to the control of each network.

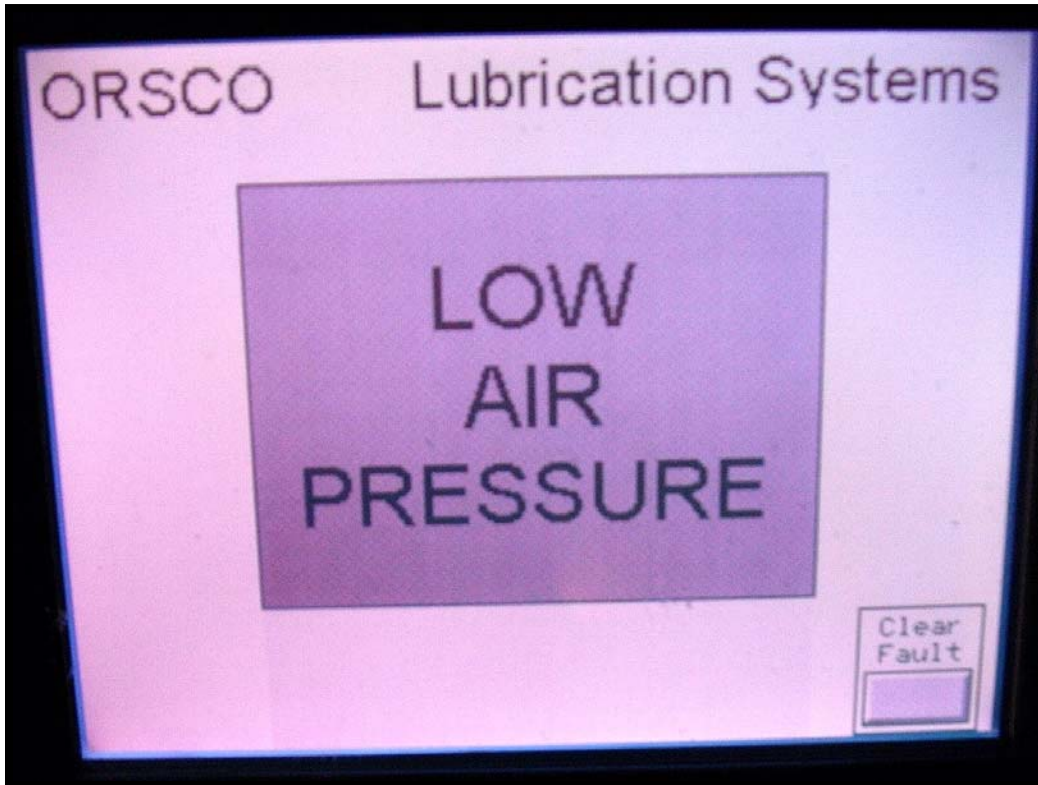

Everything above the blue dashed line is visual feedback only.

## Network Controls

These are the parameter adjustment screens for each network that can be selected from the main menu shown on the previous page.

## System Fault Indicators

When a fault occurs in the system for either Low Air Pressure or Low Oil Level, the fault is shown large as it completely fills the touch screen interface.

Low Oil Level appears as the same type of fault.
